Mr. Thompson noted that the application was submitted after the fifteenth of the month and he also noted that due to the close proximity to the Machias River and concerns about possible location within a resource protection area that Code Enforcement Officer Betsy Fitzgerald will be inspecting the site and making a report to the Planning Board.

3. DISCUSSION OF TOWER STRUCTURES ORDINANCE

The Board discussed development of a tower structures ordinance and reviewed a sample ordinance. The Board discussed height limitations to include in an ordinance. Ms. Therrien noted that the Board may want to think about stipulating the distance a tower structure can be placed from a residence; she added that the Board can determine the distance a tower structure can be located from a residence. Mr. Whalen suggested that a
clause be included in an ordinance stipulating that the final step the applicant must take after contact with the FAA/FCC is to contact the town on their intentions. Ms. Therrien advised the Board that the ordinance they develop can make stipulations on locating tower structures appropriately.

Mr. McCurdy commented that tower structures do devalue other people’s property and there is ongoing discussion of the affect of radiation. Mr. Pellon added that homeowners do not want a blinking light in their neighborhoods.

The Board asked Ms. Therrien to look at areas in Machias where tower structures could be placed. Ms. Therrien explained that this can be done by examining tax maps to determine areas where there is sufficient distance from residential locations. Ms. Therrien pointed out that the Board has time to put an ordinance in place that meets the needs of the town. Mr. Thompson requested more information from the FCC on what municipalities can do to ensure appropriate placement of tower structures. Ms. Therrien added that the Board can also look into co-location of tower structures.

On a motion by Arthur McCurdy, seconded by Joe Gurney, the Board voted to adjourn the meeting at 7:52 PM.
